About

The "Cardboard" Cathedral

Cathedrals usually stand as enduring monuments to human skill and inventiveness, and magnificent pointers to the presence of God among us. Their websites will tell you how they are the oldest, the largest, the tallest or the most significant of their kind.

ChristChurch Cathedral is slightly different. The original Cathedral was badly damaged in the Christchurch earthquake in February 2011. We are operating from our new temporary home, the Transitional Cathedral in Latimer Square, Christchurch. It is the world's only cathedral made substantially of cardboard.

This web site aims to tell you something about who we are and what we stand for. It is a work in progress. It offers a glimpse of the building, its history and its environment. It provides

information about Cathedral services and events, its music and arts programme, facilities for visitors and pilgrims, educational resources, stories about our community life and outreach, and an archive of recent sermons. We hope you will be inspired to visit Christchurch, and we look forward to welcoming you to the Cathedral.
