COVID-19 WASTEWATER DASHBOARD

WASTEWATER SURVEILLANCE

COVID-19

This dashboard is designed to share ESR’s wastewater science, and help the public track potential COVID-19 risks in their local areas with easy-to-digest data visualisation. It is optimised for both desktop and mobile use.

WASTEWATER DASHBOARD (COVID-19)

FREQUENTLY ASKED QUESTIONS

- About wastewater testing results** +

- Sampling methods** +

- What does a ‘detection’ of COVID-19 mean?** ×

A positive detection in the wastewater indicated that at least one person had been shedding COVID-19 into the wastewater in the 24 hours before each sample was collected. Just as a negative finding did not necessarily guarantee an absence of COVID-19 in the community, it should be noted that a positive finding did not necessarily mean that active COVID-19 infections were present in the community. A positive detection in the wastewater could also be

P

due to a case in a managed isolation facility and/or a non-infectious historical case or a non-infectious recently recovered case who was still shedding low levels of COVID-19.

Why wasn't my community included in the wastewater surveillance program?

Which wastewater treatment plant services my community?
