A bit about us

Get to know who we are and what we can offer you

Simplifying healthcare for everyone

Manage My Health makes it easy for people and their healthcare providers to stay connected anytime, anywhere.

Since 2008, **our secure online portal** and mobile app have empowered over **1.85 million Kiwis** to take charge of their health. Used by most health centres, Manage My Health simplifies appointment booking, repeat prescriptions, health record access, and lab results—all in one place. Linked directly to doctors' systems, it ensures up-to-date health information at your fingertips.

By removing barriers to healthcare, we help patients stay informed and engaged—without turning to Dr. Google. And as a New Zealand-owned company, we're committed to innovating and making healthcare more accessible for everyone.

Take control of your health today—download the app or sign up online!
