

COVID-19 vaccine data

Health NZ, 2026b

This page is updated weekly at 1 pm on Wednesday. Vaccine data is up to Sunday 15 February 2026.

On this page

- COVID-19 vaccinations summary
- Total vaccinations
- Booster breakdowns
- Vaccine uptake percentage by age band
- Vaccine uptake percentage by District of residence 12+
- Vaccinations by week
- Adverse events following immunisations (AEFI)

COVID-19 vaccinations summary

Second Boosters Administered	1,129,520
Total Doses Administered	14,071,514
First Boosters Administered	2,789,193
Percentage of 12+ who have completed primary course	82.4%
Percentage of eligible 50+ who have received second booster	57.0%
Percentage of eligible 18+ who have received first booster	70.8%

Metrics on this page can use one of two views of the data - An operational view or a person view.

All data comes from the Aotearoa Immunisation Register (AIR). The operational view shows all doses administered in New Zealand. The person view shows the vaccination status of people regardless of how that was recorded or whether it was in New Zealand. Those who have been vaccinated overseas will only appear in the person view; they will not appear in the operational

view. The person view includes all people that are currently alive and in AIR. On 12 June 2024, the estimated population was changed to be sourced from AIR instead of the most recent Health Service User (HSU).

Total vaccinations

	Vaccinations last week	Cumulative total
Primary Course Doses (12+)	16	8,027,859
Booster 1	43	2,789,193
Booster 2	72	1,129,520
Booster 3+	1,985	1,692,141
Paediatric First Dose	2	273,126
Paediatric Second Dose	0	159,092
Infant First Dose	0	244
Infant Second Dose	0	156
Infant Third Dose	0	183
Total doses	2,118	14,071,514

This table is an operational view.

Definitions

- **Cumulative total:** All vaccinations that have been administered and entered into the Aotearoa Immunisation Register and including Sunday 15 February 2026.
- **Vaccinations last week:** Over the 7 days up to and including Sunday 15 February 2026.

Booster breakdowns

Booster counts by ethnicity

Ethnicity	Booster 1 (16–17)	Booster 1 (18+)	Booster 2 (50+)
Māori	163	260,299	70,193
Pacific Peoples	69	155,380	30,228
Asian	186	471,078	69,977
Other	981	1,798,351	705,665
Total	1,399	2,685,108	876,063

This table is a person view.

Booster 2 uptake by age group

Age Group	Eligible	Received	Uptake
30 to 34	199,320	39,938	20.0%
35 to 49	646,341	141,359	21.9%
50 to 64	720,389	287,425	39.9%
65+	817,762	588,638	72.0%

This table is a person view.

Vaccine uptake percentage by age band

Vaccine uptake percentage by District of residence 12+

***Note, this figure does not include 0-11 year olds**

Vaccinations by week

*** Note, Third Booster + is defined as any booster dose received after a person's second booster.**

This chart shows the count of vaccinations administered in a given week from the Aotearoa Immunisation Register.

Note some records are entered in the register at a later date than the immunisation was received. This means that the figures for a given date may move for some time after that date.

Adverse events following immunisations (AEFI)

Like all medicines, the COVID-19 vaccine may cause side effects in some people. These are common, are usually mild, don't last long and won't stop people from having the second dose or going about daily life. Serious allergic reactions do occur but are extremely rare.

Suspected AEFI to COVID-19 vaccines are reported to the Centre for Adverse Reactions Monitoring (CARM). While Medsafe no longer publishes their COVID-19 vaccine safety reports, they continue to monitor reports of adverse reactions submitted to CARM.
